

**STATIC DISPLAYS
WITH DYNAMIC INFORMATION**

MAKE THE BIGGER PICTURE CLEARER

Our static displays are purpose-built to provide clearer transport communication wherever used. From bus stops to airport lounges, real-time travel information is shown in graphically pleasing LEDs that ensure passengers are never at a loss.

BUILT TO LAST

Hanover's static signs are housed in weather-proof (IP55) and vandal-proof (IK10) casing and have internal temperature and humidity control for an extremely long-life cycle.

CRYSTAL CLEAR IN ANY WEATHER

The displays automatically adjust brightness based on ambient light conditions with its anti-reflective front, ensuring constant clarity of information in any weather, day or night.

EASY TO MANAGE

The signs can be managed by any third party using an API provided by Hanover Displays or by open standards like GTFSS RT.

SIGNS THAT SPEAK YOUR LANGUAGE

All of our devices have Text to Speech capability in a variety of languages.

KEY FEATURES

- ❖ Linux OS
- ❖ Open standard internet protocols (HTTP, FTP)
- ❖ Real time arrival/departure announcements with date and time options
- ❖ Route number and destination
- ❖ Safety, emergency and advertising announcements
